

NEXORA

AI Decision Intelligence Copilot

From Data to Decisions.

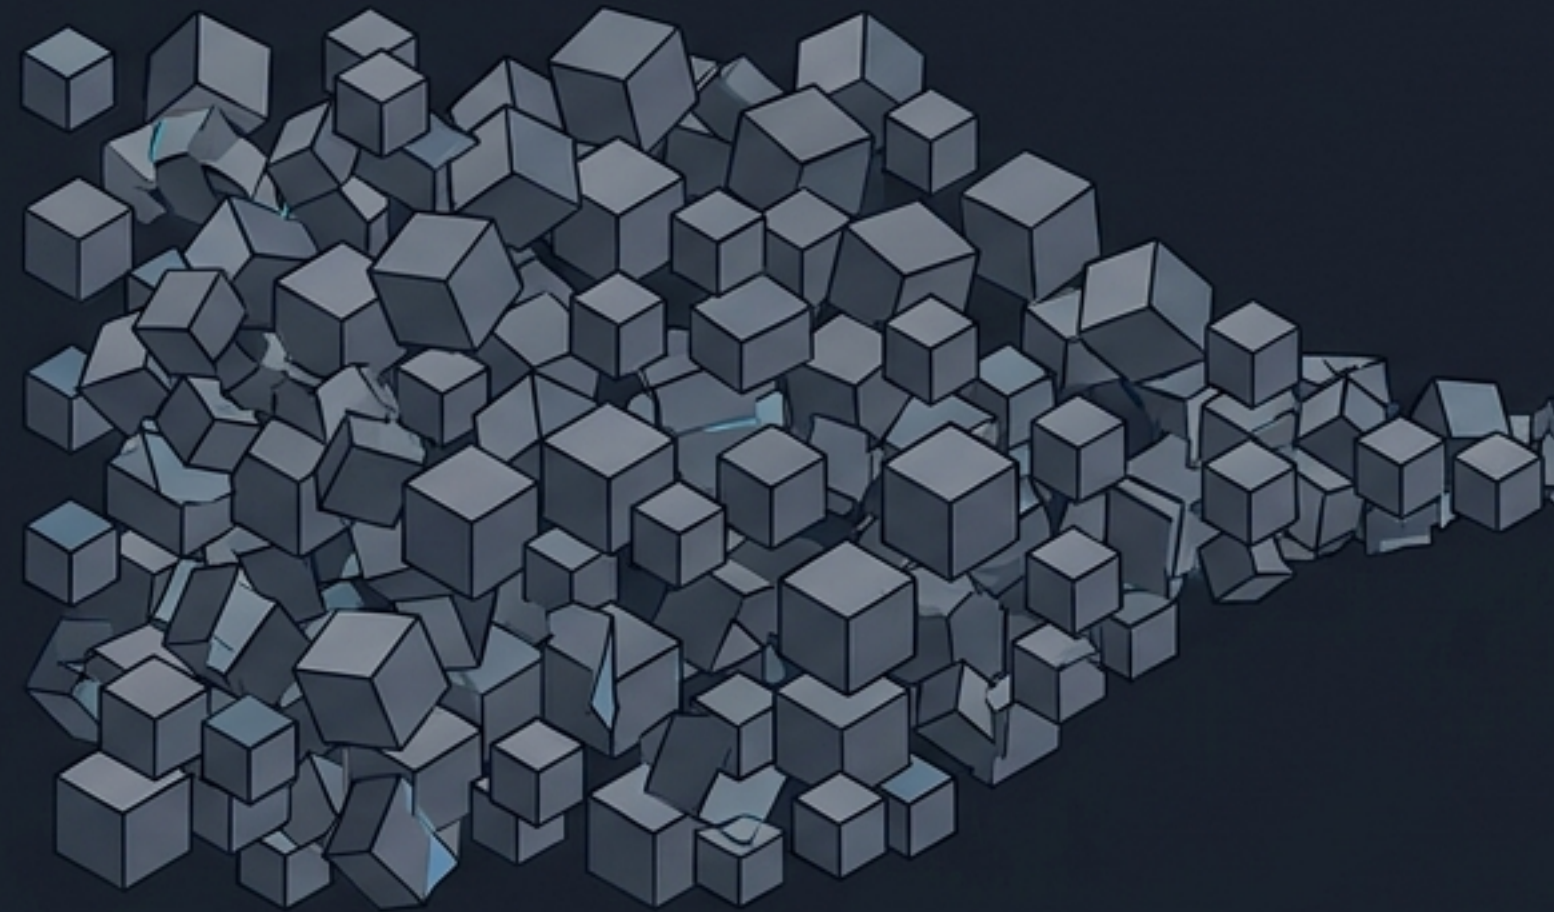

Data is everywhere. Decisions are not.

What is
happening?

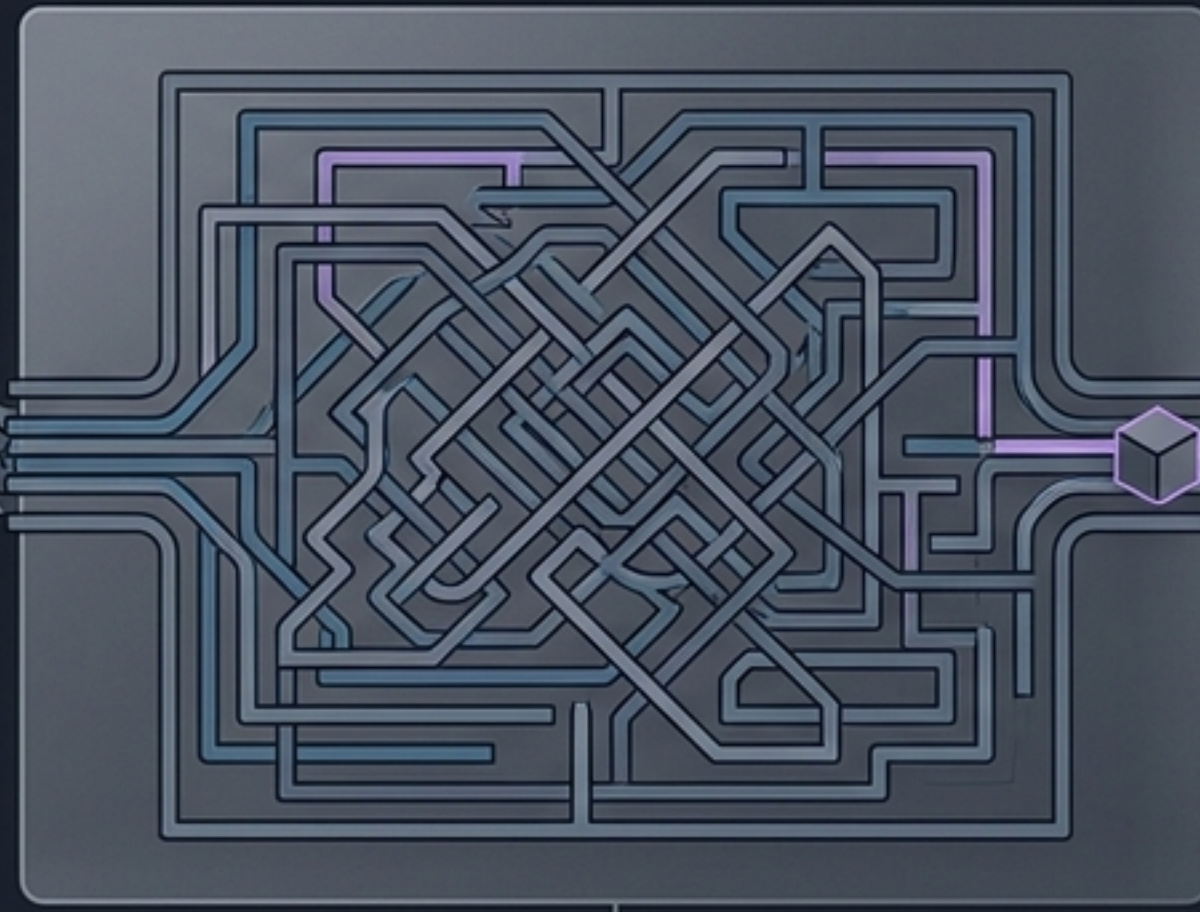

Why is it
happening?

What should
we do next?

Raw Data

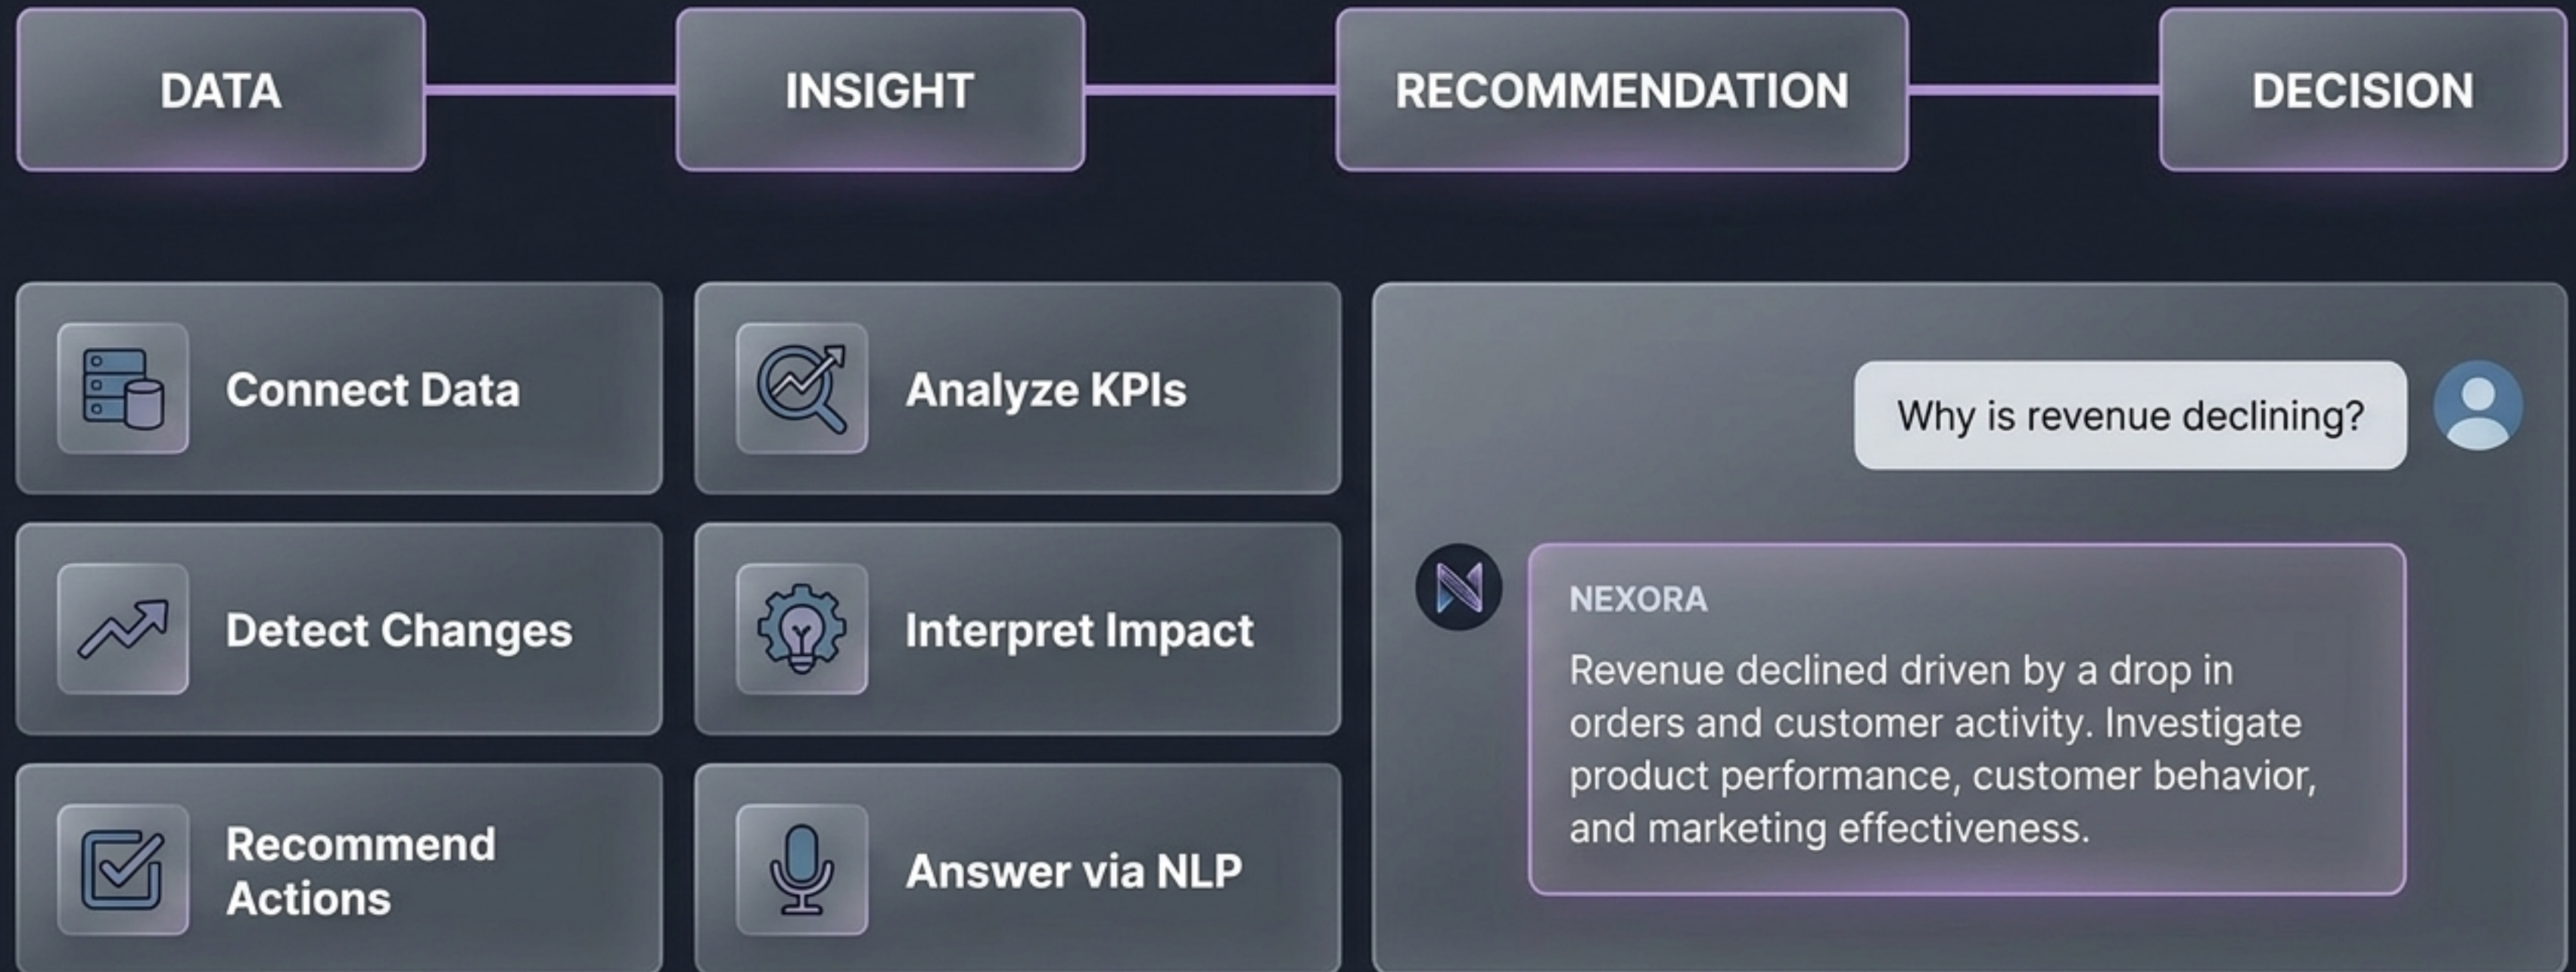

Dashboards & Manual Analysis

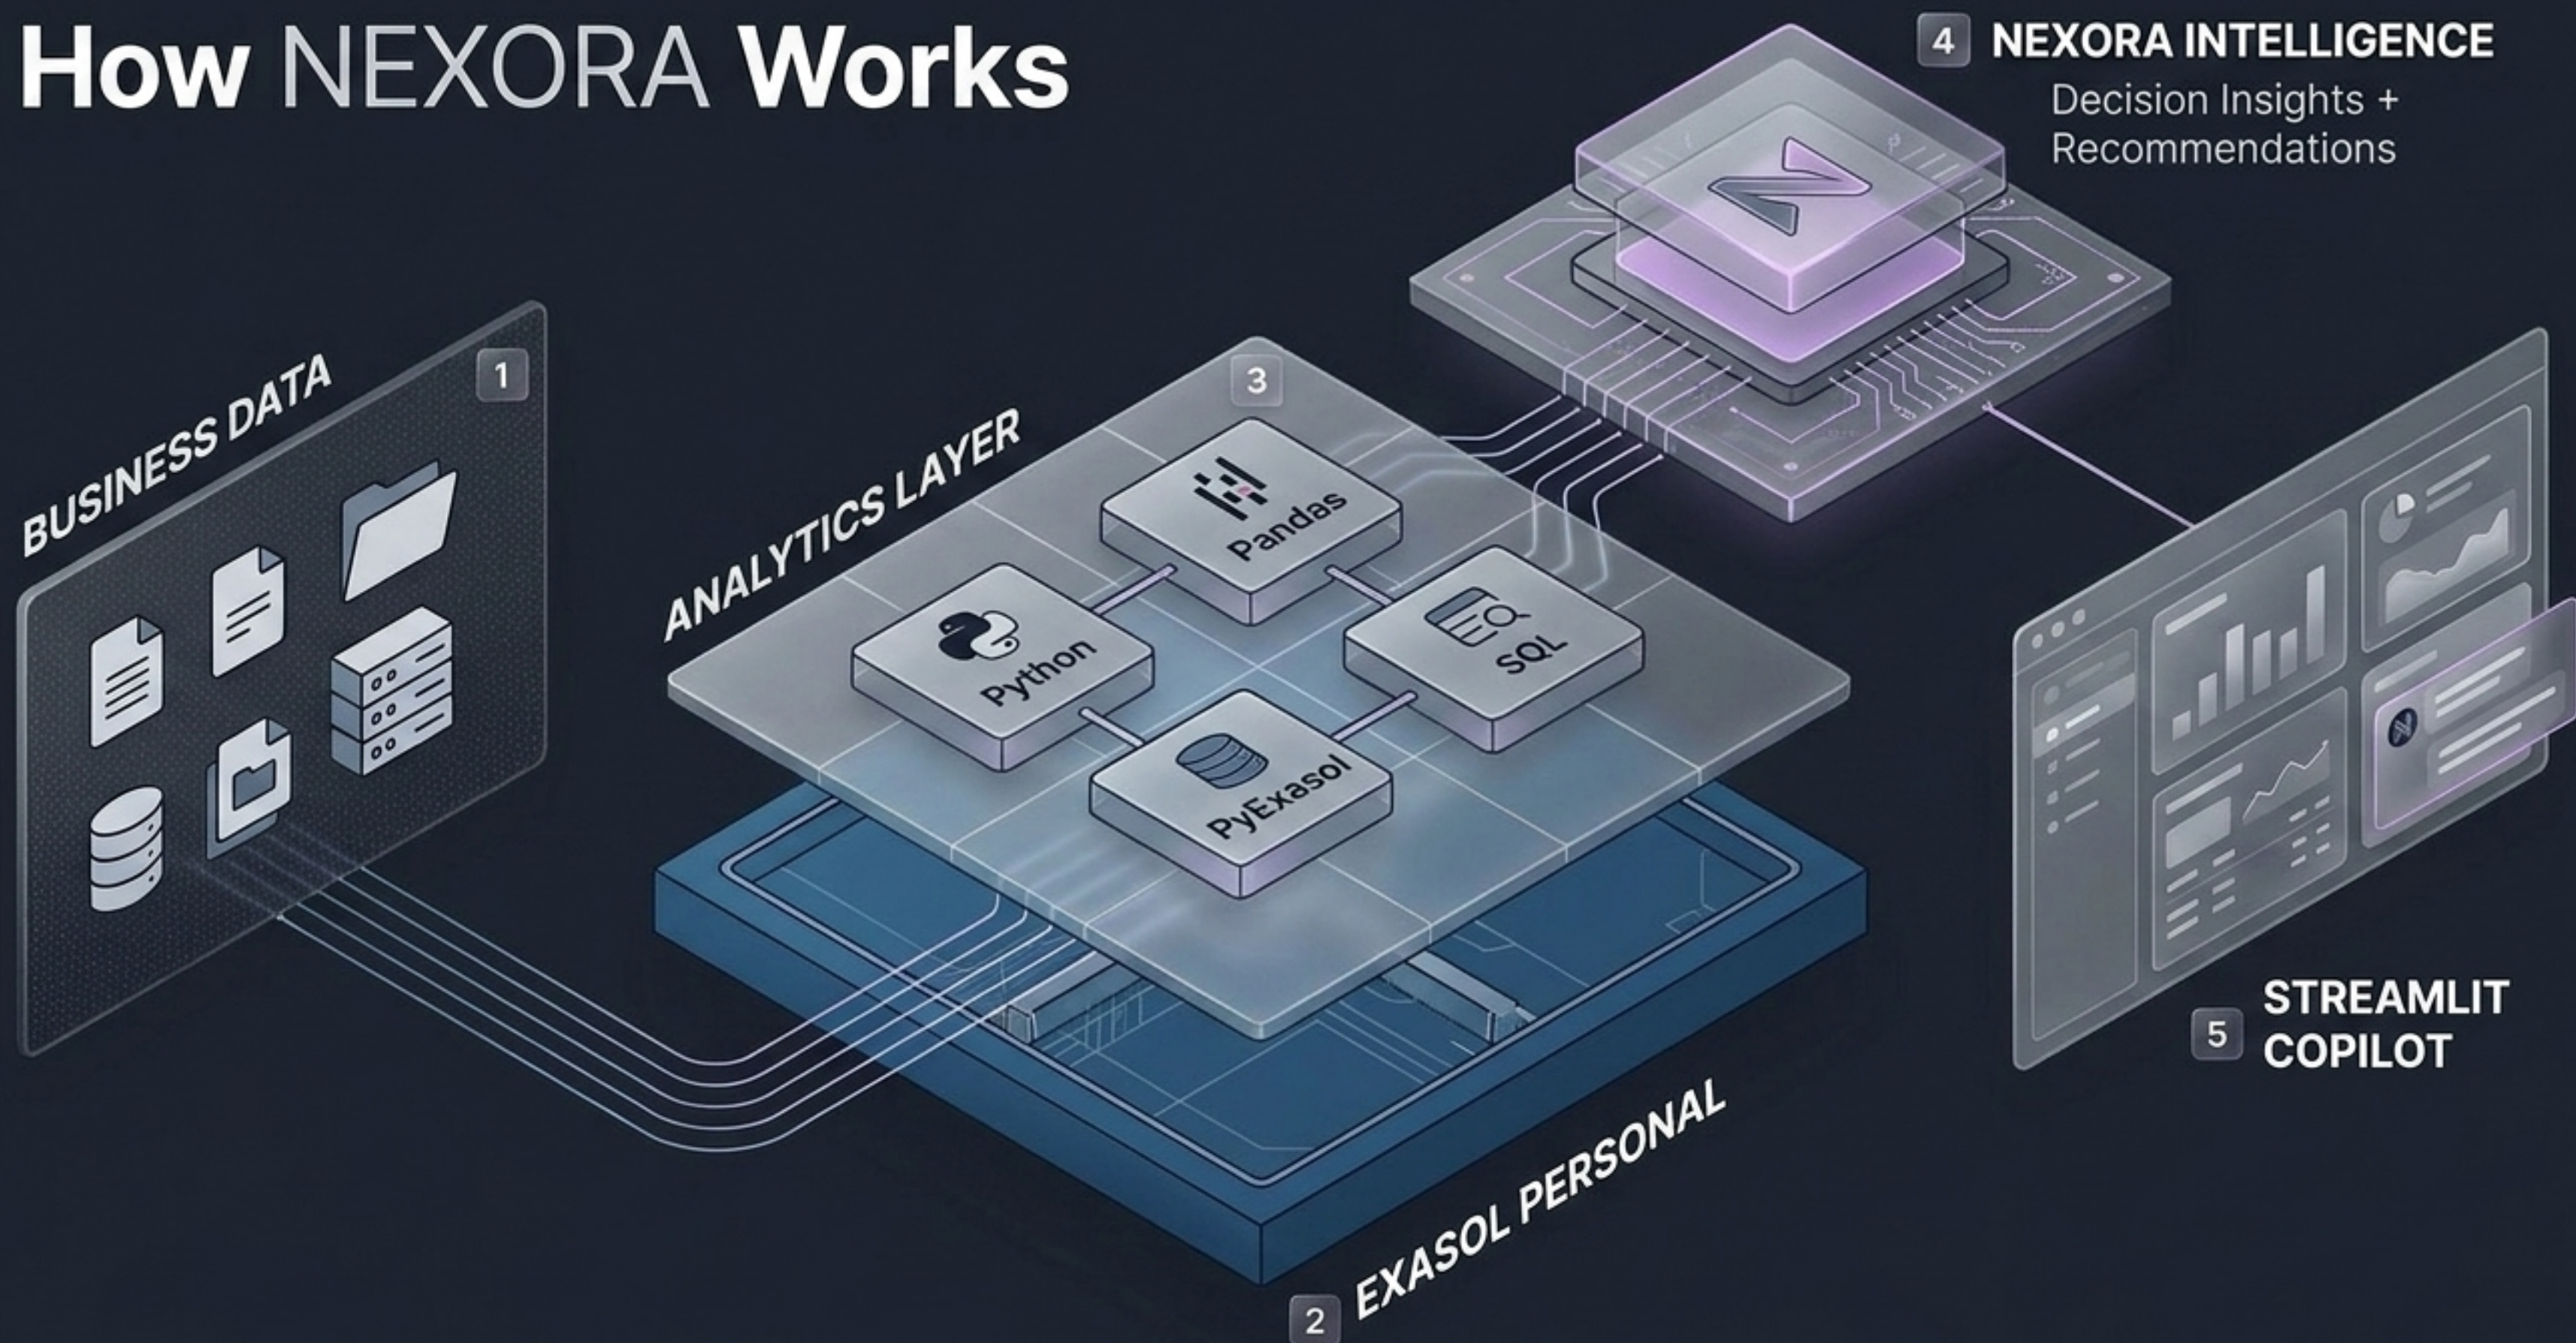

The traditional process is slow, reactive, and demands manual interpretation.

Meet NEXORA

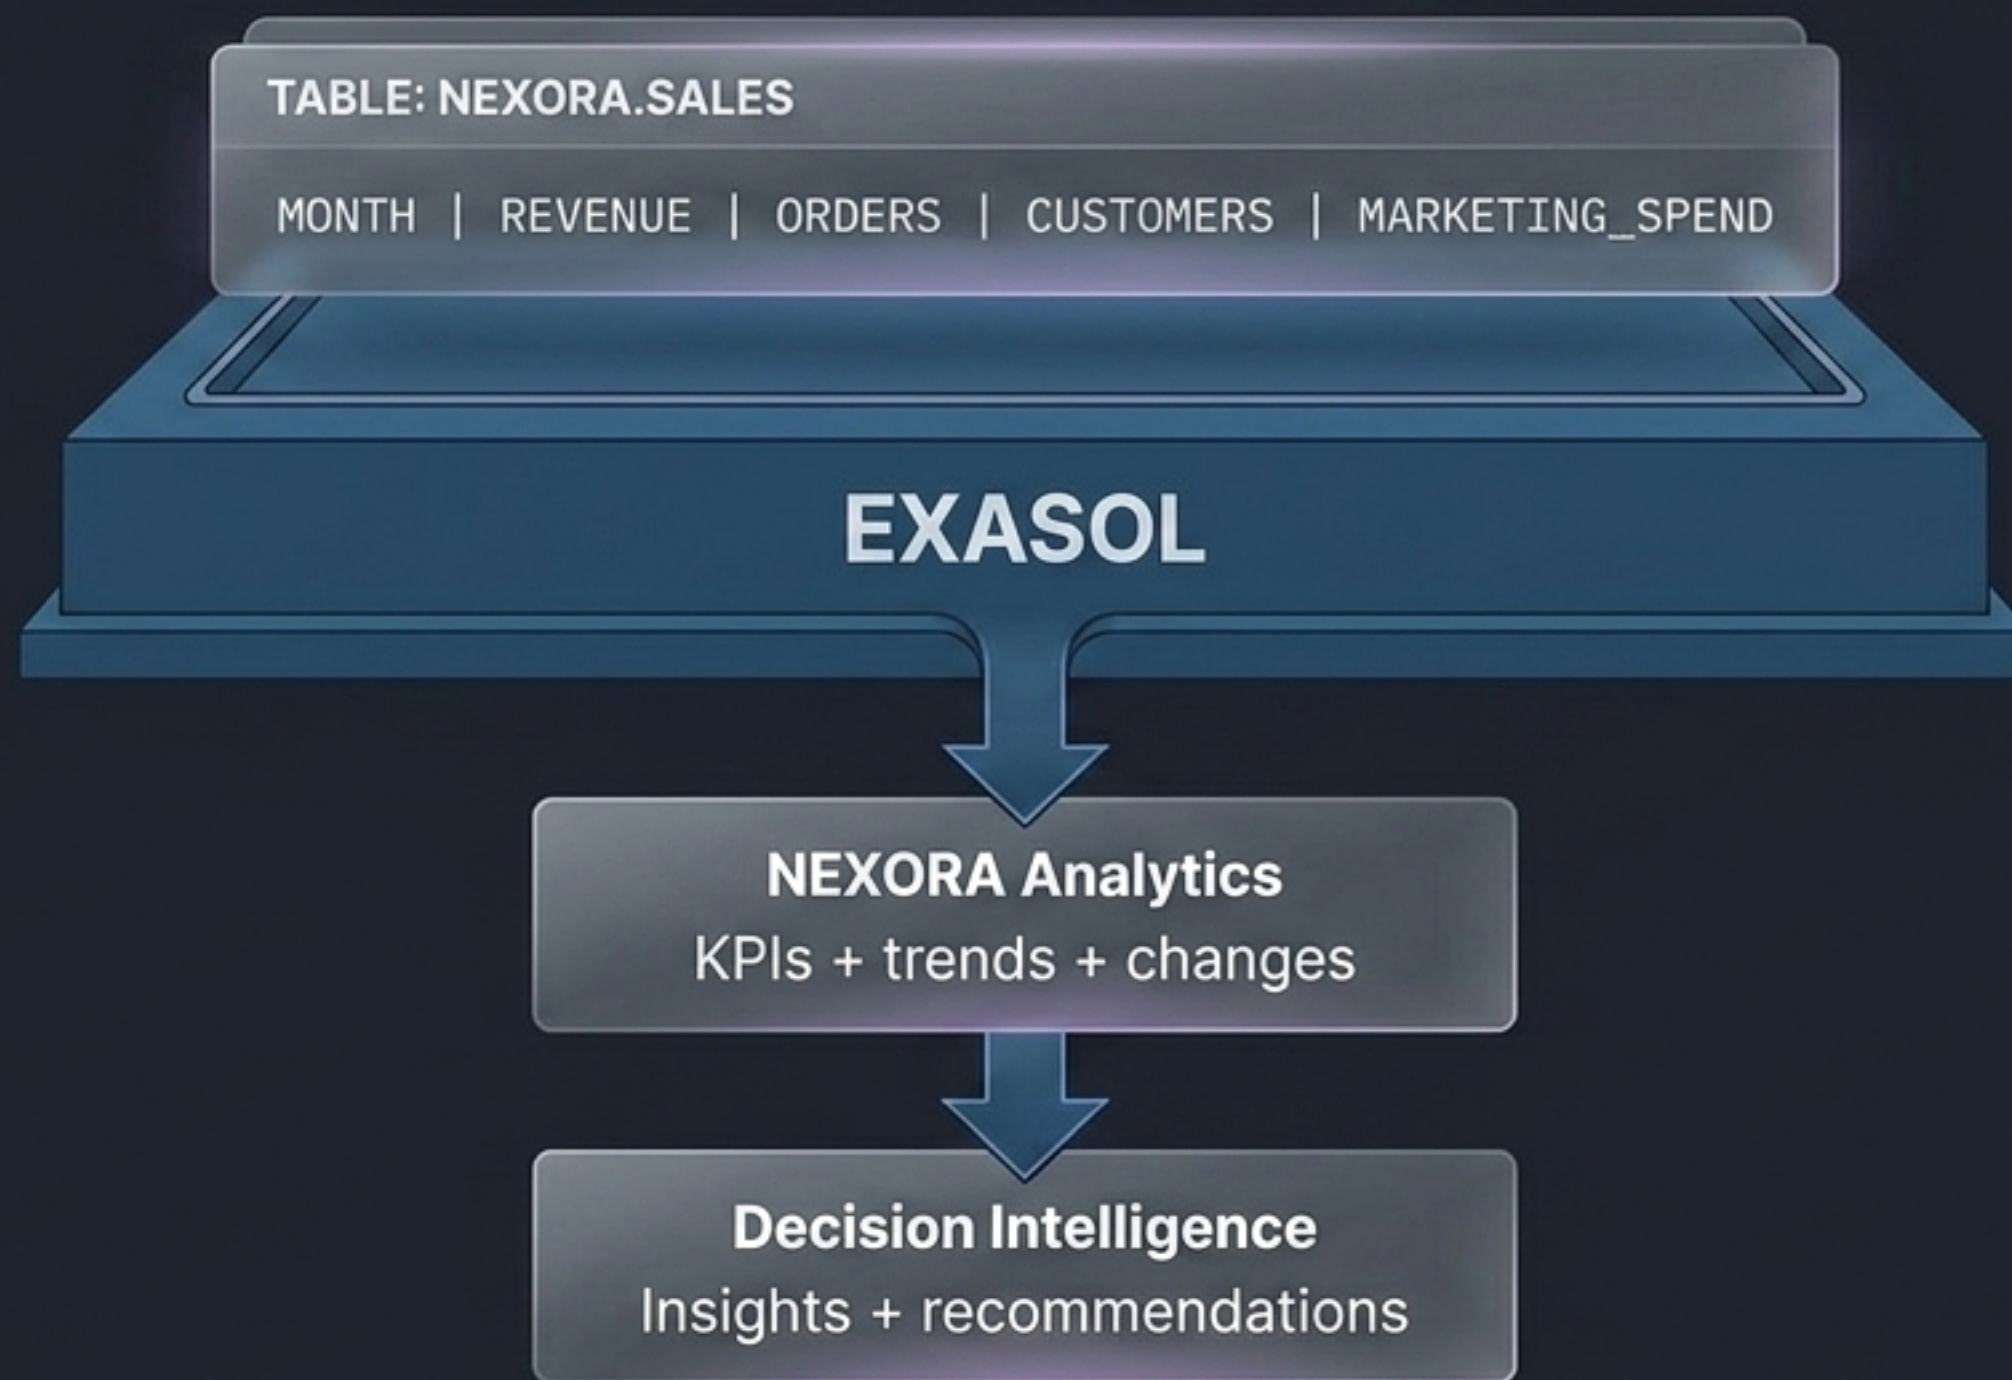

AI Decision Intelligence Copilot

How NEXORA Works

Exasol: The Data Foundation

Exasol powers the blazing-fast data layer behind NEXORA's decision pipeline.

NEXORA Goes Beyond Dashboards

Traditional Dashboard	NEXORA Copilot
Revenue = ₹108,000  Static. Requires manual investigation.	Revenue ↓ 9.2% Orders ↓ 11.3% Potential areas to investigate: - Product performance - Customer activity - Marketing effectiveness ASK NEXORA What happened to orders? What should we do?

Turning Data Into Decisions

₹763K

Total Revenue

7,260

Total Orders

6,000

Customers

₹105.10

Average Order Value

RECOMMENDED ACTION:
Investigate the revenue decline.

1. Analyze products/categories driving the decline.
2. Review customer order frequency.
3. Compare marketing performance.
4. Determine whether the decline is temporary or structural.
